## EXPERIENCE

### Mesmerise — (Unity), Software Engineer II

September 2022 - PRESENT

My responsibility was to help re-architecture the existing implementation that will be scalable for the long term. I also worked on the core platform fixing issues and creating new features.

### VRAI, Unity & Unreal Developer

July - September 2022

I worked with talented people at BAE Systems to create vr simulations for military operations and simulation. This was achieved using both c# and unreal to provide high detail training.

### Talkout Ltd, (Unity) Junior / Software Engineer

September 2020 - 2022

Working on core XR projects for a multi user platform. Additionally developing training software for various clients. I've had exposure doing demos to clients, building vr training software, api front end & backend development.

## EDUCATION

### Aberystwyth University, Aberystwyth — 2:1 Computer Science

April 2017 - July 2020

Dissertation in unity game development, data structures and algorithms, animation, web development and computer vision.

## Achievements

Doggo Jumper, Published mobile game as a personal project. This is a dog platforming game.
